SEED BED PREPARATION

CULTIVATOR WITH DISCS

XENOS

www.carre.fr

The widths: from 3 to 6 m

	Width (m)	Number of discs	Power requirement (hp)	Weight (Kg)
Fixed frame	3	22	90 to 120	1600
	3,5	26	110 to 140	1860
Folding frame	4	30	130 to 160	2120
	5	38	170 to 200	2650
	6	46	200 to 250	3180

The frame

Mechanically welded frame
Main beam: 300x300 mm - front part 100x100 & rear part 200x100
2 square bars 80x80 – inter-bar spacing 1 m
Hydraulic folding to 2,5 m in 2 sections with twin hydraulic safety mechanisms
Hydraulic locking & unlocking for the transport and work positions

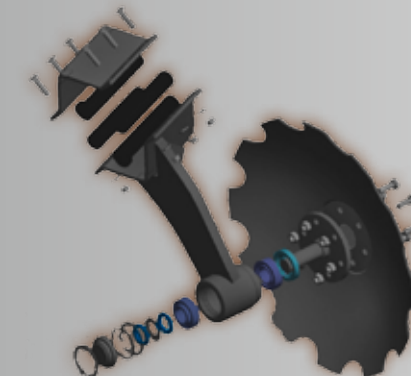

XENOS

DISCS AND HUBS

Able to work on depth of 5 to 15 cm with high organic debris without blocking risk

- Under beam clearance 900 mm
- Notched discs Ø 610mm, depth 6 with distance from 13mm between 2 discs.
- Assembly with 260mm pitch on the same bar
- Independent discs support
- Blades angle of 17° in direction of travel & 7° laterally
- Sealed bearing & without maintenance
- Safety elastomer pudding with holding lug

DRILL AT THE SAME TIME!

Sowing seed by surface broadcasting
Hydraulically driven fan
Seed rates from 2 to 100 kg / hectare –
Automatic mechanical or radar seed rate control
400 L hopper

Loading platform included.

THE FAST

Xenos will allow you to have a superficial seedbed, intense & very quick : 12 to 16km/h.

You get high work rates.
A disc implement which offers you the possibility to cultivate even with an important quantity of residues.

CULTIVATOR !

XENOS ensures you a well mixing, and allows a fast decomposition of the residues as well as a good conservation of the humidity level in the soil.

XENOS is a polyvalent tool, limiting the using cost (consuming) & maintenance.

BENEFIT FROM CARRÉ'S EXPERIENCE AFTER 75 YEARS OF INNOVATION

CARRÉ is a family run company based in the Vendée. Since 1938 we have endeavoured to design, build and market equipment intended for soil preparation, drilling, fertilisation and a complete range of crop management. Our aim is to offer you equipment that is designed to suit your conditions.

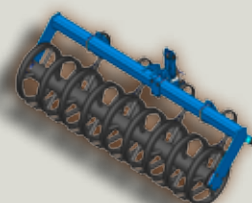

Carré is located in the heart of an agricultural region, and all of its products are developed in partnership with recognised cereal farmers. You will therefore benefit from their knowledge and their experience with implements, when buying Carré equipment.

Over the last 75 years the company has received several prizes for innovation and it would like to assist you in the management of your crops in order to obtain optimal yields.

THE EQUIPMENT

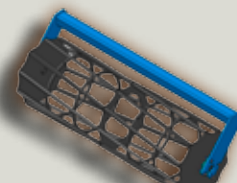

- **Optimal soil consolidation.**
Suitable for stony soils

Single roller U Ø500

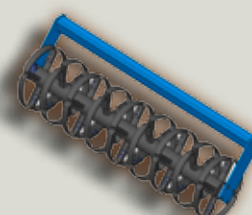

- **Crumble and press the layer of soil that has been worked**

Single roller 8 bars 25 square Ø445
Double roller 10 bars 25 square Ø600

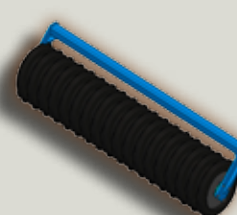

- **Optimal soil consolidation.**
Suitable for heavy soils

Packer with flexible blades

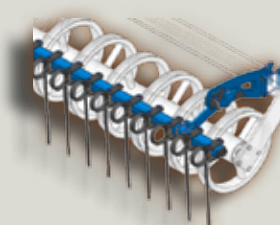

- **To consolidate the ground and to leave a weatherproof finish.**
To help to reduce the risk of erosion.

Wavy disc roller Ø600 Spacing 150

- **Exposes broadleaved weeds in order to avoid their regrowth**

Comb harrow Ø 16 – assembly with single or double roller.

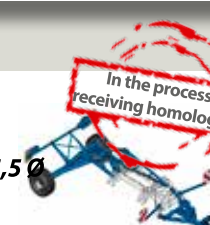

The options

✓ **TO AVOID SOIL BEING THROWN UP**
Side deflectors with plates

✓ **TO AVOID SOIL BEING THROWN UP**
Side deflectors with discs

✓ **REDUCES THE STRESS ON THE LINKAGE, AND EASES MANOEUVRABILITY**
Trailed version, wheels 40/60x15,5 Ø 870x400 – width 2.40m

✓ **STRESSFREE ROAD USE**
Road lighting and markers
